Thin Solid Films 346 (1999) 309–313

thin solid films

Subject Index of Volume 346

Adherence
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162
Adhesion
Adhesion enhancement of optical coatings on plastic substrate via ion treatment, 196
Alumina
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162
Aluminium
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150
Electrical properties of AlN thin films deposited at low temperature on Si(100), 174
Research on the thermal expansion behavior of anodic films on aluminium, 280
Amphiphilic hemicyanine dyes
A spectroscopic study of hemicyanine dyes in anionic micellar solutions, 145
Annealing
The effect of rapid thermal annealing on properties of plasma enhanced CVD silicon oxide films, 202
Anodic film
Research on the thermal expansion behavior of anodic films on aluminium, 280
Atomic force microscopy
Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100
Influence of annealing on the surface topography of MgF_2: an atomic force microscopic study, 230

Barium strontium titanate oxide (BST)
Analysis of AC electrical response for radio-frequency sputtered $(Ba_{0.5}Sr_{0.5})TiO_3$ thin film, 269
Barium titanate
Optical and electrical properties of $BaTiO_3$ thin films prepared by chemical solution deposition, 212
Bilayers
The growth of $CoSi_2$ using a Co/Zr bilayer on different Si substrates, 244
Boron
Effects of BF_2^+ implantation on the oxidation resistance of copper films, 186

Carbon
Diamond-like carbon films with extremely low stress, 130
Effects of substrate temperature on the properties of tetrahedral amorphous carbon films, 155
Carbon nitride
Formation of cubic C_3N_4 thin films by plasma enhanced chemical vapor deposition, 96
Chemical solution deposition
Optical and electrical properties of $BaTiO_3$ thin films prepared by chemical solution deposition, 212
Chemical vapour deposition
Comparative study of the structural properties of nanocrystalline Ge:H plasma deposited onto the cathode and the anode using high hydrogen dilutions, 91
Coalescence
Phase separation on solid surfaces: nucleation, coarsening and coalescence kinetics, 1
Coarsening
Phase separation on solid surfaces: nucleation, coarsening and coalescence kinetics, 1
Coatings
Diamond-like carbon films with extremely low stress, 130
Adhesion enhancement of optical coatings on plastic substrate via ion treatment, 196
Cobalt
The growth of $CoSi_2$ using a Co/Zr bilayer on different Si substrates, 244
Cobalt oxide
Cobalt oxide films grown by a dipping sol-gel process, 138
Cole plot
Analysis of AC electrical response for radio-frequency sputtered $(Ba_{0.5}Sr_{0.5})TiO_3$ thin film, 269
Computer simulation
Experimental and modeling study of the sputtered particle transport in an r.f. magnetron discharge, 290
Copper
Effects of BF_2^+ implantation on the oxidation resistance of copper films, 186
Sputter-deposited Mo and reactively sputter-deposited Mo-N films as barrier layers against Cu diffusion, 299
Corrosion
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150
Crystalline structure
Influence of non-perovskite phases on ferroelectric and dielectric behavior of electron-beam deposited PZT thin films, 108
$Cu_3(Si_{1-x}Ge_x)$
Room temperature oxidation of $Cu/Si_{0.76}Ge_{0.24}$ annealed at 200 to 300°C, 207

Deposition process
P-I-N diodes on high deposition rate thick a-Si:H layers from pure SiH_4, 255
Deposition temperature

0040-6090/99/$ - see front matter © 1999 Elsevier Science S.A. All rights reserved.
PII: S0040-6090(99)000301-6

Effects of substrate temperature on the properties of tetrahedral amorphous carbon films, 155
Diamond
Nucleation and growth of diamond on silicon substrate coated with polymer, 120
Diamond-like carbon films
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162
Diamond-like nanocomposite film
Ion beam assisted deposition of diamond-like nanocomposite films in an acetylene atmosphere, 82
Dielectric response
Analysis of AC electrical response for radio-frequency sputtered $(Ba_{0.5}Sr_{0.5})TiO_3$ thin film, 269
β-Diketone
Yellow green electroluminescnece generated from the thin films of β-diketone-zinc complex, 69
Dipping sol-gel preparation
Cobalt oxide films grown by a dipping sol-gel process, 138

Electric field
Influence of an internal electric field in a sample on the photoemission phenomenon, 191
Electrical properties
Electrical properties of AlN thin films deposited at low temperature on Si(100), 174
Optical and electrical properties of $BaTiO_3$ thin films prepared by chemical solution deposition, 212
Electrochemical behaviour
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150
Emission yield
Influence of an internal electric field in a sample on the photoemission phenomenon, 191

Ferroelectrics
Influence of non-perovskite phases on ferroelectric and dielectric behavior of electron-beam deposited PZT thin films, 108
Fluorine
Effects of BF_2^+ implantation on the oxidation resistance of copper films, 186
Fourier transform infrared spectroscopy
The effect of rapid thermal annealing on properties of plasma enhanced CVD silicon oxide films, 202
Self-Immobilization of reactive molecules and nanoparticles in two-dimensional organic networks, 238
Friction
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162

Germanium
Comparative study of the structural properties of nanocrystalline Ge:H plasma deposited onto the cathode and the anode using high hydrogen dilutions, 91
Germanium segregation
Room temperature oxidation of $Cu/Si_{0.76}Ge_{0.24}$ annealed at 200 to 300°C, 207
Gold
Intermetallic phase formation and shear strength of a Au–In microjoint, 125
Graphitization
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162
Growth mechanism
Nucleation and growth of diamond on silicon substrate coated with polymer, 120

Haematite films
Humidity-sensing properties of nanocrystalline haematite thin films prepared by sol-gel processing, 266
Hot isostatic pressing
Nanocarbons formed in a hot isostatic pressure apparatus, 86
Humidity sensors
Humidity-sensing properties of nanocrystalline haematite thin films prepared by sol-gel processing, 266
Hydrophobic interactions
A spectroscopic study of hemicyanine dyes in anionic micellar solutions, 145

Impedance
Analysis of AC electrical response for radio-frequency sputtered $(Ba_{0.5}Sr_{0.5})TiO_3$ thin film, 269
Indium
Intermetallic phase formation and shear strength of a Au–In microjoint, 125
Infrared spectroscopy
The effect of nitrogen doping on the structure of cluster or microcrystalline silicon embedded in thin SiO_2 films, 275
Insulators
The stacking faults and their strain effect at the Si/SiO_2 interfaces of a directly bonded SOI (silicon on insulator), 169
Features of metal–insulator–semiconductor diodes with tunnel insulator subjected to UV soaking, 226
Interface
The stacking faults and their strain effect at the Si/SiO_2 interfaces of a directly bonded SOI (silicon on insulator), 169
Ion beam assisted deposition
Ion beam assisted deposition of diamond-like nanocomposite films in an acetylene atmosphere, 82
Ion bombardment
Adhesion enhancement of optical coatings on plastic substrate via ion treatment, 196

Langmuir–Blodgett films
The structural changes of MoS_2 nanoparticle LB film during rubbing process, 234
Self-Immobilization of reactive molecules and nanoparticles in two-dimensional organic networks, 238
Light scattering
Improved thin film solar cell with Rayleigh scattering in porous silicon pipes, 261

Metal deposition
Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100
Metal—organic chemical vapour deposition
In situ IR and spectroscopic ellipsometric analysis of growth process and structural properties of $Ti_{1-x}Nb_xO_2$ thin films by metal–organic chemical vapor deposition, 73

Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100
Micelles
A spectroscopic study of hemicyanine dyes in anionic micellar solutions, 145
Micromachining
Technology of integrable free-standing yttria-stabilized zirconia membranes, 251
Molybdenum
Sputter-deposited Mo and reactively sputter-deposited Mo-N films as barrier layers against Cu diffusion, 299
Monolayers
Self-Immobilization of reactive molecules and nanoparticles in two-dimensional organic networks, 238
Morphology
Influence of annealing on the surface topography of MgF_2: an atomic force microscopic study, 230
Multilayer coating
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150

Nanocarbons
Nanocarbons formed in a hot isostatic pressure apparatus, 86
Nanoparticle
The structural changes of MoS_2 nanoparticle LB film during rubbing process, 234
Nanostructures
Comparative study of the structural properties of nanocrystalline Ge:H plasma deposited onto the cathode and the anode using high hydrogen dilutions, 91
The effect of nitrogen doping on the structure of cluster or microcrystalline silicon embedded in thin SiO_2 films, 275
Neutron scattering
Neutron reflectivity investigation of the effects of harsh environments on Ta_2N thin films, 116
Nitrides
Electrical properties of AlN thin films deposited at low temperature on Si(100), 174
Sputter-deposited Mo and reactively sputter-deposited Mo-N films as barrier layers against Cu diffusion, 299
Nitrogen
The effect of nitrogen doping on the structure of cluster or microcrystalline silicon embedded in thin SiO_2 films, 275
Nucleation
Phase separation on solid surfaces: nucleation, coarsening and coalescence kinetics, 1
Nucleation and growth of diamond on silicon substrate coated with polymer, 120

Optical properties
Cobalt oxide films grown by a dipping sol-gel process, 138
Optical and electrical properties of $BaTiO_3$ thin films prepared by chemical solution deposition, 212
Organic electroluminescent device
Yellow green electroluminescnece generated from the thin films of β-diketone-zinc complex, 69
Oxidation
Effects of BF_2^+ implantation on the oxidation resistance of copper films, 186
Oxide substrates
Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100
Oxides
In situ IR and spectroscopic ellipsometric analysis of growth process and structural properties of $Ti_{1-x}Nb_xO_2$ thin films by metal–organic chemical vapor deposition, 73
Features of metal–insulator–semiconductor diodes with tunnel insulator subjected to UV soaking, 226

Perovskite phase
Influence of non-perovskite phases on ferroelectric and dielectric behavior of electron-beam deposited PZT thin films, 108
Phase separation
Phase separation on solid surfaces: nucleation, coarsening and coalescence kinetics, 1
Photoemission
Influence of an internal electric field in a sample on the photoemission phenomenon, 191
Physical vapour deposition coating
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150
Plasma enhanced chemical vapour deposition (PECVD)
Formation of cubic C_3N_4 thin films by plasma enhanced chemical vapor deposition, 96
Plasma processing and deposition
Diamond-like carbon films with extremely low stress, 130
P-I-N diodes on high deposition rate thick a-Si:H layers from pure SiH_4, 255
Polymers
Nucleation and growth of diamond on silicon substrate coated with polymer, 120
Adhesion enhancement of optical coatings on plastic substrate via ion treatment, 196
Self-Immobilization of reactive molecules and nanoparticles in two-dimensional organic networks, 238
Porous silicon
Improved thin film solar cell with Rayleigh scattering in porous silicon pipes, 261
Pulsed laser deposition
Structural and optical characterisation of Nd doped $YAlO_3$ films deposited on sapphire substrate by pulsed laser deposition, 284
PZT thin film
Influence of non-perovskite phases on ferroelectric and dielectric behavior of electron-beam deposited PZT thin films, 108

Raman scattering
Effects of substrate temperature on the properties of tetrahedral amorphous carbon films, 155
The effect of nitrogen doping on the structure of cluster or microcrystalline silicon embedded in thin SiO_2 films, 275
Room temperature oxidation
Room temperature oxidation of $Cu/Si_{0.76}Ge_{0.24}$ annealed at 200 to 300°C, 207

Sensors
Technology of integrable free-standing yttria-stabilized zirconia membranes, 251

Sequential evaporation
Direct formation of Ag–diaminoanthraquinone (DAAQ) complex salts by sequential evaporation, 181
Silicides
The growth of $CoSi_2$ using a Co/Zr bilayer on different Si substrates, 244
Silicon
Features of metal–insulator–semiconductor diodes with tunnel insulator subjected to UV soaking, 226
Technology of integrable free-standing yttria-stabilized zirconia membranes, 251
Improved thin film solar cell with Rayleigh scattering in porous silicon pipes, 261
The effect of nitrogen doping on the structure of cluster or microcrystalline silicon embedded in thin SiO_2 films, 275
The growth of $CoSi_2$ using a Co/Zr bilayer on different Si substrates, 244
Silicon oxide
The stacking faults and their strain effect at the Si/SiO_2 interfaces of a directly bonded SOI (silicon on insulator), 169
The effect of rapid thermal annealing on properties of plasma enhanced CVD silicon oxide films, 202
Silver
Direct formation of Ag–diaminoanthraquinone (DAAQ) complex salts by sequential evaporation, 181
Solar cells
Improved thin film solar cell with Rayleigh scattering in porous silicon pipes, 261
Sol-gel processing
Humidity-sensing properties of nanocrystalline haematite thin films prepared by sol-gel processing, 266
Solid surfaces
Phase separation on solid surfaces: nucleation, coarsening and coalescence kinetics, 1
Spectroscopic ellipsometry
In situ IR and spectroscopic ellipsometric analysis of growth process and structural properties of $Ti_{1-x}Nb_xO_2$ thin films by metal–organic chemical vapor deposition, 73
Sputtering
Experimental and modeling study of the sputtered particle transport in an r.f. magnetron discharge, 290
Sputter-deposited Mo and reactively sputter-deposited Mo-N films as barrier layers against Cu diffusion, 299
Stress
The effect of rapid thermal annealing on properties of plasma enhanced CVD silicon oxide films, 202
Structural properties
Comparative study of the structural properties of nanocrystalline Ge:H plasma deposited onto the cathode and the anode using high hydrogen dilutions, 91
Cobalt oxide films grown by a dipping sol-gel process, 138
Structure
Ion beam assisted deposition of diamond-like nanocomposite films in an acetylene atmosphere, 82
Surface and interface states
Features of metal–insulator–semiconductor diodes with tunnel insulator subjected to UV soaking, 226
Surfactants
A spectroscopic study of hemicyanine dyes in anionic micellar solutions, 145
Tantalum
Neutron reflectivity investigation of the effects of harsh environments on Ta_2N thin films, 116
Thermal expansion coefficient
Research on the thermal expansion behavior of anodic films on aluminium, 280
Thin films
Influence of an internal electric field in a sample on the photoemission phenomenon, 191
Structural and optical characterisation of Nd doped $YAlO_3$ films deposited on sapphire substrate by pulsed laser deposition, 284
Influence of annealing on the surface topography of MgF_2: an atomic force microscopic study, 230
Titanium oxides
In situ IR and spectroscopic ellipsometric analysis of growth process and structural properties of $Ti_{1-x}Nb_xO_2$ thin films by metal–organic chemical vapor deposition, 73
Corrosion behaviour of Al/Ti coating elaborated by cathodic arc PVD process onto mild steel substrate, 150
Experimental and modeling study of the sputtered particle transport in an r.f. magnetron discharge, 290
Transmission electron microscopy (TEM)
Formation of cubic C_3N_4 thin films by plasma enhanced chemical vapor deposition, 96
Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100
Intermetallic phase formation and shear strength of a Au–In microjoint, 125
The stacking faults and their strain effect at the Si/SiO_2 interfaces of a directly bonded SOI (silicon on insulator), 169
Room temperature oxidation of $Cu/Si_{0.76}Ge_{0.24}$ annealed at 200 to 300°C, 207
Tribochemical change
The structural changes of MoS_2 nanoparticle LB film during rubbing process, 234
Tribological properties
The structural changes of MoS_2 nanoparticle LB film during rubbing process, 234
Tungsten
Experimental and modeling study of the sputtered particle transport in an r.f. magnetron discharge, 290

Vacuum arc deposition
Effects of substrate temperature on the properties of tetrahedral amorphous carbon films, 155

Wear
The tribological characteristics of diamond-like carbon films at elevated temperatures, 162

X-ray diffraction
Intermetallic phase formation and shear strength of a Au–In microjoint, 125
Research on the thermal expansion behavior of anodic films on aluminium, 280
Structural and optical characterisation of Nd doped $YAlO_3$ films deposited on sapphire substrate by pulsed laser deposition, 284
X-ray photoelectron spectroscopy (XPS)

Formation of cubic C_3N_4 thin films by plasma enhanced chemical vapor deposition, 96
Iridium film growth with iridium tris-acetylacetonate: oxygen and substrate effects, 100

Yellow-green photoluminescence
Yellow green electroluminescnece generated from the thin films of β-diketone-zinc complex, 69

YSZ
Technology of integrable free-standing yttria-stabilized zirconia membranes, 251

Zinc complex
Yellow green electroluminescnece generated from the thin films of β-diketone-zinc complex, 69
